Here's a step-by-step guide to install MySQL Workbench:

📥 Download MySQL Workbench

Option 1: Official MySQL Website

1. Go to: mysql.com/products/workbench
2. Click "Download" (usually at the top right)
3. Select your operating system
4. Choose the appropriate installer

Option 2: Direct Downloads

- Windows: `mysql-workbench-community-8.0.xx-winx64.msi`
- macOS: `mysql-workbench-community-8.0.xx-macos-x86_64.dmg`
- Linux: Available via package managers

🪟 For Windows Users

Step 1: Run Installer

1. Double-click the `.msi` file you downloaded
2. If prompted by Windows SmartScreen, click "More info" → "Run anyway"

Step 2: Installation Wizard

Setup Type:
• Complete (recommended): Installs all components
• Custom: Choose specific features

Select Components (if Custom):
☑ MySQL Workbench
☑ MySQL Documentation
☑ MySQL Connectors
☑ MySQL Notifier (optional)

Step 3: Installation Process

1. Accept the license agreement
2. Choose installation folder (default: `C:\Program Files\MySQL\MySQL Workbench 8.0 CE\`)
3. Click "Install"
4. Wait for completion (5-10 minutes)

Step 4: Complete Setup

1. Check "Launch MySQL Workbench" if you want to start immediately
2. Click "Finish"
