1. MongoDB Community Edition (Free)

🪟 Windows Installation

Method A: Using MongoDB Installer

1. Download MongoDB Community Server from mongodb.com/try/download/community
2. Run the installer (.msi file)
3. Choose "Complete" setup type
4. Check "Install MongoDB as a Service"
5. Install MongoDB Compass (GUI tool) if desired
6. Click Install

Method B: Using Chocolatey

```
choco install mongodb
```

🐳 Docker Installation

```
# Pull MongoDB image
docker pull mongo
```

```
# Run MongoDB container
docker run -d -p 27017:27017 --name mongodb mongo

# Run with persistent storage
docker run -d -p 27017:27017 --name mongodb -v ~/mongo-data:/data/db mongo
```

✅ Verification & Basic Usage

Check Installation

```
# Check MongoDB version
mongod --version

# Start MongoDB service
# Windows: Runs as service automatically
# macOS: brew services start mongodb-community
# Linux: sudo systemctl start mongod

# Connect to MongoDB
mongosh  # or mongo in older versions
```

Basic MongoDB Commands

📱 MongoDB GUI Tools

1. MongoDB Compass (Official)
2. Studio 3T
3. NoSQLBooster
4. Robo 3T

⚠️ Troubleshooting

- Port 27017 already in use: Check if MongoDB is already running
- Permission denied: Use `sudo` or check directory permissions
- Connection refused: Ensure MongoDB service is running
